## DETAILED ACTION

### ***Allowable Subject Matter***

Claims 7-8 are allowed.

The following is an examiner's statement of reasons for allowance:

Referring to claims 7-8, the prior art of record fails to anticipate or rendered obvious the combined elements/steps of, "the cable modem termination system has an allocated address manager for storing the IP address notified by the first cable modem corresponding to an address of the first cable modem itself, and for renewing its storage and notifying a second cable modem to clear the stored IP address making a subscriber terminal connected to the second cable modem in a state of having an unallocated IP address when the IP address is already stored by a notification form the first cable modem", as recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The examiner further notes that the prior art fails to teach notifying the other (second) cable modem to clear the stored IP address to make the subscriber terminal connected to the other (second cable) modem be in a state where the IP address is unallocated when the address is already stored by a notification from another (first) cable modem. Claim 7 is represented in the specification by Figure 15, for sending a prohibited IP notification (M34) to a cable modem 200, after a cable modem 300

Art Unit: 2623

receives an IP address that was previously stored in cable modem 200, and was not properly deleted after the expiration time. Fijolek teaches the notification of deleting (releasing) an IP address from its table, but fails to teach doing so after another cable modem has already stored the IP address, which prevents improper dual use of the same IP address and is well beyond the conventional DHCP address assignment process.
